

WELCOME TO YOUR UHS MEDICAL HOME

UHS staff work closely together to offer healthcare in a medical home model: comprehensive, coordinated, and delivered in a manner that best suits your needs. At the core is your relationship with a primary care clinician and their team, who by getting to know you and your health history are able to work in partnership with you, your family, and other providers to help you stay healthy during your time at UC Berkeley and beyond. All UC Berkeley students, regardless of health insurance, have full access to services at UHS. Please review the Patient Rights & Responsibilities document that is posted on the clinic wall and feel free to ask any of the staff if you have any questions. We look forward to working with you!

MEET YOUR PRIMARY CARE TEAM

There are 3 Primary Care clinic teams which consist of doctors, nurse practitioners, clinic nurses, medical assistants, and Behavioral Health Providers (BHPs). Students are automatically assigned a Primary Care Provider (PCP)/Medical Home Team on registration. We strongly encourage you to see your PCP or one of the other members on the team whenever you visit Primary Care in order to best coordinate your needs. The better we get to know you, the higher quality and more efficient your care! However, should you wish to change your PCP based on specialty interest or personal preference you are always able to do so online through eTang. We frequently consult with each other to ensure you receive the best possible care.
