FACE YOUR FEARS
Stopping smoking can be hard. Thoughts of quitting may feel overwhelming. Acknowledge your fears of becoming free from tobacco and make a plan to face these fears.

- Do you usually smoke your first cigarette within a half hour after waking up?
- Do you find it hard not to smoke in non-smoking areas?
- Do you smoke 10 or more cigarettes a day?
- Do you smoke 2 or more cigarettes a day?
- Do you smoke more during the morning than during the rest of the day?
- Do you smoke even when you’re sick?

GET HELP WITH NICOTINE REPLACEMENT THERAPY (NRT)
Nicotine Replacement Therapy (NRT) combined with a stop smoking program has been shown to double your chances of success in becoming a non-smoker. NRT comes in many forms and it is important to take time to learn how to use NRT effectively. And remember, even if you have tried a method in the past, you can try again. Persistence is key; learn from your previous attempts at stopping and keep trying.
