

Cell Phones, Cell Towers, & Wireless Safety

Wed, Feb 27

Tang Education Center

12:10-1:30pm

Presentation 12:10-1pm

Q & A 1-1:30pm

Speaker: Dr. Joel Moskowitz

Director and Principal Investigator

UC Berkeley Center for Family and Community Health

More than 240 scientists who have published over 2,000 papers on electromagnetic fields and biology or health are concerned that wireless radiation exposure from cell phones, cell towers, and other wireless devices increases your risk of cancer, infertility, and neurologic disorders. Learn about the latest research on wireless radiation safety and steps you can take to protect yourself and loved ones from potential harm.
